

# Property Insurance Policy Guide

Synthetic educational content created for an insurance knowledge-copilot prototype. Verify all real-world decisions against official policy wording, insurer procedures, and applicable regulations.

## Purpose

This synthetic guide explains common property-insurance concepts for retrieval testing. It does not describe a specific insurer's policy.

## Policy structure

A property policy may contain a schedule, insuring agreement, definitions, coverage sections, exclusions, conditions, deductibles, endorsements, and claim procedures.

## Covered perils

Depending on the product, coverage may include fire, selected natural perils, theft following forcible entry, or accidental physical damage. Exact coverage must be confirmed in the policy wording.

## Exclusions

Common exclusions may involve wear and tear, gradual deterioration, intentional acts, lack of maintenance, war, nuclear risks, or losses outside the policy period. Exclusions vary.

## Limits and deductibles

The sum insured is subject to policy terms. Coverage sections may have sub-limits and deductibles. Underinsurance and valuation basis can affect settlement.

## After an incident

Take reasonable steps to prevent further damage, preserve evidence where safe, notify authorities when required, and retain photographs, invoices, and repair estimates.

## Interpretation caution

A summary is not a substitute for the complete policy wording. Where a summary conflicts with the policy, the applicable policy terms and law govern.
