

Insurance Client Onboarding Guidelines

Synthetic educational content created for an insurance knowledge-copilot prototype. Verify all real-world decisions against official policy wording, insurer procedures, and applicable regulations.

Purpose

This synthetic guide models generic insurance-brokerage onboarding and is not an official Marsh, insurer, or regulatory procedure.

Client profile

Capture legal name, contact details, business activity or personal needs, locations, stakeholders, and communication preferences. Collect only information needed for the stated purpose.

Insurance requirements

Record assets, exposures, coverage objectives, existing policies, renewal dates, relevant claims history, risk controls, and potential coverage gaps.

Due diligence

Complete applicable identity, entity, sanctions, beneficial-ownership, and other checks according to the jurisdiction and organizational policy. Record status and evidence.

Document checklist

Typical documents can include registration records, identification, policy schedules, loss runs, asset schedules, financial information, risk questionnaires, and signed declarations.

Review and approval

A reviewer should confirm completeness, document exceptions and conflicts, and verify that the account has appropriate approval before progressing.

Handover

Transfer ownership with open actions, due dates, client preferences, source documents, and a traceable record.

Data quality

Use standardized fields, mandatory checks, duplicate detection, versioning, and clear ownership. Sensitive information must be limited to authorized users.
